Responsive Web Design (freeCodeCamp)

Almost every new client these days wants a mobile version of their website. It's practically essential after all: one design for the [...] for the iPhone, the iPad, netbook, Kindle — and all screen resolutions must be compatible, too. In the next five years, we'll likel[y...] a number of additional inventions. When will the madness stop? It won't, of course. In the field of Web design and developme[nt...] getting to the point of being unable to keep up with the endless new resolutions and devices. For many websites, creating a w[ebsite for] each resolution and new device would be impossible, or at least impractical. Should we just suffer the consequences of losing [...] device, for the benefit of gaining visitors from another? Or is there another option? Responsive Web design is the approach th[at...] design and development should respond to the user's behavior and environment based on screen size, platform and orientatio[n...] consists of a mix of flexible grids and layouts, images and an intelligent use of CSS media queries. As the user switches from th[...] the website should automatically switch to accommodate for resolution, image size and scripting abilities. One may also have [...] settings on their devices; if they have a VPN for iOS on their iPad, for example, the website should not block the user's access t[o...] words, the website should have the technology to automatically respond to the user's preferences. This would eliminate the ne[ed...] design and development phase for each new gadget on the market.
